We are pleased to invite you to the webinar **"From Innovation to Validation: How Verticals Can Benefit from European Testbeds"** organised by NetworldEurope SME WG and p-NET on the 11 of November 2026 at 15:00 CET.

European testbeds and Testing and Experimentation Facilities (TEFs) are becoming increasingly important tools for turning innovative ideas and research results into tested, validated and closer to deployment solutions.

For SMEs and vertical industries, access to specialised infrastructure, technical expertise and real-world experimentation environments can help reduce development risks, accelerate innovation and open access to capabilities that may otherwise be difficult to reach.

This webinar will provide information on European testing and experimentation facilities and initiatives available to innovators and showcase concrete examples of how SMEs and verticals can benefit from testing, validation and federated infrastructures.
